ACIS 704/88  
14 October 1988

MEMORANDUM FOR:

Office of Congressional Affairs

FROM:

ADC/ACIS

SUBJECT:

Unclassified Strategic Nuclear Delivery  
Vehicle (SNDV) Statement

1. Please transmit the statement below to Mr. Bruce MacDonald of Senator Bumper's staff by normal procedures through the SSCI as a response to your request of 14 October 1988.

"According to information provided to us through the Intelligence Committee, recent Soviet actions leave them below the 820 MIRVed ICBM launcher subceiling, as well as below the 1320 MIRVed ICBM/SLBM/ALCM heavy bomber subceiling. The information provided also appears to put the Soviets slightly above the 1200 MIRVed ICBM/SLBM subceiling. The Soviets have, on occasion, temporarily exceeded this sublimit since mid-1987. It is quite possible that the Soviets will exceed some of these limits in the future as the US continues to remain above the 1320 subceiling."

2. We believe this statement is unclassified and approve it for public use.
